Horizontal Defence Diagram
Case study — Attack Defence Tree ATM Case, Difficulty and Probability values
Zoom out — Simplified macro view
Zoom out — Comprehensive view
Comparison

The modular structure allows to compare multiple datasets showing easily tree maps based on a single node.
Structure — all nodes and edges are visible even if the recurrences are presented only one time.
DIFFICULTY

LOW
HIGH

PROBABILITY

LOW
HIGH

ATTACKS

COUNTERMEASURE

SYMBOLS

'AND'

'BOTH'
Case study — How Horizontal Diagram reacts to actual data
Case study — How Horizontal Diagram reacts to actual data, i.e. Manual attack Physical approach without opening ATM

Note — Zooming in the interactive visualisation, the arrangement of the layered nodes highlights the selected view of the tree maintaining its hierarchical structure.
